

Mohamed Yassine Hemissi

AI Engineering Student – Graduating 26/27 | AI / Machine Learning / GenAI / Software Engineering
hemissiyassine@gmail.com | LinkedIn | GitHub | Website

PROFILE

I started in computer science — algorithms, systems, the fundamentals of how software works — and found myself drawn toward the math underneath AI: probability, optimization, the structures that make systems learnable. That progression now shapes how I build: solutions engineering grounded in both solid fundamentals and a research-driven curiosity

EDUCATION

ESPRIT – Private Higher School of Engineering and Technology 2024 – Present (Expected 2027)
AI Engineering Degree (GPA: 16/20)
Theoretical & applied AI, data-driven systems, probability theory (random variables, Markov methods), linear optimization, graph theory.

University of Science of Tunis 2021 – 2024
Bachelor's Degree, Computer Science (GPA: 15/20)
Data structures & algorithms, computer networks, compilers, automata theory, algebra, calculus, applied software engineering.

PROFESSIONAL EXPERIENCE

ODDO BHF | AI Engineering Intern Jun 2026 – Aug 2026
• Worked within the OBAM (ODDO BHF Asset Management) Data team, delivering multiple business automation solutions using PRISME.AI from high-level problem statements.
• Designed and deployed automations that eliminated repetitive manual processes, reducing execution time by up to 25×.

ESPRIT – Mobility Department | AI Engineering Intern Mar 2026 – Aug 2026
• Developed AI-powered automation solutions with a team of 3, including conversational assistants, automated form processing, and internal platforms to reduce repetitive workload across the Mobility Department by 50-60%.

H&H Agency | Co-Founder & Freelance Software Engineer (Part-time) 2021 – 2026
• Delivered freelance software projects for clients across France, Tunisia, Qatar, USA and Canada in diverse industries to 15+ clients.

Artify Inc | Software Development Intern (Twice) Jan 2024 – Jul 2024 & Jun 2025 – Aug 2025
• Designed and implemented full backend architecture from scratch for a producer content management platform, including automated ingestion pipelines, database design, and APIs feeding Artify's main streaming service.
• Collaborated with CEO to deliver content management features enabling onboarding of 100+ media producers to the platform.

Sagemcom | Software Development Intern Jun 2023 – Aug 2023
• Built internal tooling to automate KPI discovery and production data tracing, reducing the time required for factory engineers to generate BI dashboards.
• Worked in an agile/Scrum team under senior engineer mentorship, contributing to code reviews and maintaining engineering best practices.

Bubble Fest – First EDM Festival in Tunisia | Technical Lead & Co-founder Feb 2022 – Jul 2022
• Designed and operated system architecture capable of handling 30,000+ simultaneous user requests during high-demand ticket sales.
• Delivered a full-stack open-source solution reducing technology costs by 95% while ensuring system reliability.

SELECTED PROJECTS

TMS – AI-Powered Poultry Industry Management Platform University Project | ESPRIT 2026
• Contributed to the development of an AI-powered enterprise platform designed to optimize operations in the Tunisian poultry industry through automation, analytics, and intelligent decision-support systems.
• Ranked **2nd among 100+ projects** for the SDGs award at the *13th Edition of Bal des Projets ESPRIT*, recognizing the project's innovation.

Metabolic Health Decision-Support System (Insulin Resistance) University Project | ESPRIT 2025
• Designed an academic AI-based decision-support system analyzing lifestyle and nutrition data related to insulin resistance, with emphasis on explainability and non-diagnostic outputs.
• Built a nutritional extraction pipeline to construct a Tunisian dataset used for context augmentation, described in a short paper.

DeglaAI – Early Palm Tree Disease Detection University Project | ESPRIT 2025
• Designed and integrated AI components using IoT, image, and audio data for early palm tree disease detection; system integrated into a palm ERP for data-driven decision support.
• **Top 5** at the 2025 APII Incubator Competition with prospective startup coaching.

SKILLS

Languages: Python, TypeScript, Java, Lua, C, Bash, SQL (CSQL, PLSQL)
Web & Databases: Next.js, Node.js, NestJS, Django, Flask, REST APIs, tRPC, MCP, MongoDB, Cassandra, Vector Databases (Chroma, Qdrant)
AI & ML: LLMs (LangGraph, OpenAI SDK, AI SDK), PyTorch, Computer Vision (CNN, ViT)
Infrastructure & DevOps: Linux (UFW, Nginx), Docker, SSL/TLS, AWS (Lambda, S3), Vercel, Render, Sentry
Practices: Git, GitHub Actions, Agile/Scrum, TDD (Jest, Playwright), AI-Assisted Development
Certifications: AWS ML Foundations · IBM AI Enterprise Workflow L2 · DataCamp Associate AI Engineer · 10+ Nvidia AI/DL Certificates

LANGUAGES

English (Professional Working Proficiency) | French (Native or Bilingual) | Arabic (Native or Bilingual)

ASSOCIATIONS & ACTIVITIES

Programming Instructor | Instructor for 15–20 students per cohort, teaching core computer science. 2022 – 2025
Unity Events | Co-founder | Organized musical events, managed teams, and booked international artists. 2022 – 2024
IEEE – Computer Science Chapter | Member | Participated in competitive programming events (IEEEExtreme). 2021 – 2023
Rotaract RCTB | Founding Protocol Chief | Executive member overseeing coordination and organizational governance. 2021 – 2022
